Asturias, Spain · Remote

Junior full stack developer with a Higher Diploma in Multiplatform App Development (2026). I have built complete web and mobile apps on my own, from the frontend and database to production deployment, and I have worked at companies on web development, automation and Salesforce. I use AI as an everyday tool and I'm looking for a team where I can keep learning and contribute from day one.

EXPERIENCE

- Grupo Cobra** · Automation Developer, part-time Present
- Building automations for internal processes to reduce manual work.
- Capgemini** · Salesforce Developer 2026
- Contributed to a custom Salesforce accelerator that automates outgoing communications.
 - Built UI components with Lightning Web Components (LWC) and backend logic in Apex.
- Funiverse** · Frontend Web Developer 2025
- Built a website from scratch with HTML5, CSS3 and JavaScript, fully responsive on mobile.
 - Ongoing maintenance and resolution of technical issues.
- Introvisual** · Web Developer / SEO Consultant 2025
- Organic SEO, site structure and keyword optimisation to improve search visibility.
 - WordPress content management and maintenance.

PROJECTS

- Judo Astures Website** · Freelance project for a sports club 2026
- Website for a judo club with five locations in Asturias, designed to get families to book a trial class. Scroll animations, an interactive map of locations and accessibility best practices.
- Astro · TypeScript · GSAP · Lenis · Leaflet
- GestionBarber** · Full stack platform github.com/LuisJardon/GestionBarber
- Online booking, admin dashboard, JWT authentication, FAQ chatbot and a native Android app. In production with Docker + Nginx.
- React 19 · TypeScript · FastAPI · MySQL · Android · Docker · Nginx
- VeoVeo App** · Android app github.com/LuisJardon/VeoVeoApp
- App to keep track of the films and series I watch, with its own REST API.
- Android · Flask (Python) · SQLite
