I finished my DAM diploma in 2026 and since 2024 I've been building complete applications, from the database and API to the interface and the server they run on. I did my internship at Capgemini working with Salesforce and I now automate processes part-time at Grupo Cobra. I'm looking for my first full-time role, in Asturias or remote.

Experience

2026 – present — **Moncobra (Grupo Cobra)** · Automation Developer *(part-time)*
- Python tool (pymupdf, openpyxl) that reads each construction site's monthly accounting reports in PDF and fills in the control spreadsheet that used to be completed by hand.
- If a figure doesn't add up, it writes nothing and flags it; new sites are added automatically. Now preparing its move to SharePoint with Power Automate.

2026 – present — **Freelance** · Web Developer for local businesses
- judoastures.es, the website of Club Judo Astures and its five locations: Astro, a Leaflet map and free trial class booking via WhatsApp. Hosted on Cloudflare Pages.
- With every client: questionnaire, mock-up, fixed-price proposal and launch.

2026 — **Capgemini** · Salesforce Developer *(internship, DAM work placement)*
- Custom accelerator to automate outbound communications from Salesforce, using Apex and Flows.
- UI components with Lightning Web Components and server-side logic in Apex.

2025 — **Funiverse** · Frontend Web Developer *(internship)*
Company website built from scratch with HTML, CSS and JavaScript, mobile-friendly, plus maintenance.

2025 — **Introvisual** · Web Development & SEO *(internship)*
Page structure, keywords and WordPress content to improve visibility on Google.

Projects

2026 — **GestionBarber** · *DAM final project, in production*
Online booking for a barbershop, with an admin panel and an Android app. React 19 and TypeScript, FastAPI API with JWT, MySQL, Docker and Nginx. github.com/LuisJardon/GestionBarber

2026 — **Radar** · *my own tool*
Finds clients for my web work: combines open map data with DuckDB and checks each business's website (speed, SEO, legal notice). Around 2,000 businesses in Gijón analysed. FastAPI, SQLite and Docker.

2024 – 2026 — **Home server** · *Home Lab*
An old laptop turned into a server: Debian with Docker Compose, HTTPS via Caddy, a WireGuard VPN and the whole setup versioned in Git. It hosts my portfolio, GestionBarber and my tools.

Skills

Languages	Java, Python, JavaScript, TypeScript, SQL	**Frameworks**	Spring Boot, React, FastAPI, Flask, Astro
Salesforce	Apex, LWC, Flows	**Databases**	MySQL, PostgreSQL, SQLite, MongoDB
Deployment	Docker, Linux, Nginx, Caddy, Cloudflare	**Teamwork**	Git, CI/CD, Scrum

Education

2026 — **Higher Technician in Multiplatform App Development (DAM)** · *Tuniverse*

Professional Certificate IFCT0609, Computer Systems Programming · *SmartMind*

Building with Artificial Intelligence · *MoureDev*
